Our strategic growth priorities

Our five strategic growth priorities are connected and supported by a growing set of complementary capabilities to bring innovation to the entire health care system and create more value for the consumers we serve.

Value-Based Care

Integrating care in the clinic, in home and virtually to comprehensively serve more people in ways that achieve higher-quality outcomes at a lower cost.

Health Benefits

Building on proven coverage options with innovative benefits that prioritize simplicity, affordability and better health outcomes.

Health Technology

Using clinical data and AI to simplify administrative processes, support clinical decision-making and improve transparency, efficiency and quality across the health system.

Health Financial Services

Streamlining payment processes to improve accuracy and the experience for providers, while making payments simpler, more convenient and affordable for consumers.

Pharmacy Services

Lowering the cost of drugs while integrating direct-to-consumer offerings with medical, pharmacy and community health capabilities.

Optum Insight

Optum Insight is partnering with payers, providers, governments and life sciences companies to simplify and enhance clinical, administrative and financial processes through software-enabled services and analytics, while advancing value-based care. Our differentiated products, technology insights, clinical expertise and analytics support the entire health system — ultimately delivering better experiences for consumers.

Delivering evidence-based clinical guidelines and tools

Providing evidence-based clinical insights at the point of care to help clinicians identify next best actions and deliver better patient outcomes.

Creating administrative efficiency

Streamlining administrative transactions by connecting and enriching data flows and analytics-driven intelligence.

Simplifying payment processes for payers and providers

Increasing the speed, accuracy and security of payments.

Optum Insight Highlights

Creating a modern health system through better insights

Optum Insight is improving the flow of health data and information to create a simpler, smarter and more connected system. Our solutions help customers manage rising medical costs, deliver quality health care and eliminate unnecessary administrative waste.

~$33B
projected revenue backlog for 2024

Our administrative, clinical and payment solutions support payers, providers and life sciences companies. We combine our deep expertise in health care with advanced data, technology and analytics, including artificial intelligence and machine learning.

We support care providers transitioning to value-based care with clinical decision support tools based on the most up-to-date standards of care. Data-driven insights embedded into the clinical workflow help clinicians quickly identify at-risk patients and address their care needs. In 2024, our provider enablement tools will help primary care physicians close approximately 25 million gaps in care.

With a large database of real world claims and clinical information, we partner with life sciences companies to accelerate innovation and transform the life cycle of medicine development to positively advance patient care and improve health outcomes.

160
global life sciences customers served

Our technology solutions help improve claims accuracy at every step of the billing cycle and automate prior authorizations — saving time, lowering costs and eliminating unnecessary delays. Our payment solutions simplify payments across care providers, payers and consumers. Payment information is shared quickly and accurately, while our payment integrity services deliver billions in annual savings to payers.

Supporting health systems

We partner with health systems to help them remain financially stable, improve community care and accelerate growth and performance. We manage and staff key functions, including revenue cycle, information technology and clinical operations. Scalable and standardized operations help remove performance variability, collaboration tools assist with prioritizing operations, and 24/7 workforce support helps clients improve operating results and invest in strategic opportunities.

>$190B

annualized billings managed for revenue cycle customers

Our solutions help health systems maintain financial independence, while further advancing streamlined and efficient care at the local level.

Optum Insight growth outlook

Optum Insight expects to deliver double-digit revenue growth over the long term as we continue to invest in advanced technologies. Our innovative products and services, competitive positioning and diverse capabilities contribute to continued growth in our sales pipeline and revenue backlog, and we target long-term operating margins of 18% to 22%.

Realizing our growth opportunity in Life Sciences & Healthcare

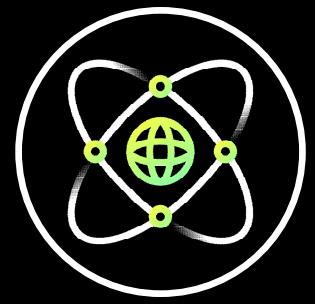

1 Modernizing Intelligence Platforms

Making intelligence actionable through scalable next-generation technologies and exceptional user experiences

2 Driving Product Innovation

Catalyzing synergistic capabilities to penetrate market whitespace and unlock value with customers

3 Investing in Real World Data

Building a growth engine from enriched, pharma-grade data and therapy area franchise solutions

© 2024 Clarivate. All rights reserved.

Making intelligence actionable through next-generation technologies

1

Modernizing Intelligence Platforms

Focus on core platforms enabled through AI

Consolidating into scalable core platforms and leveraging AI to drive product quality and advanced analytics

Evolve to workflow solutions

Complementing our market intelligence with AI-infused software to translate data into contextually-recommended action and outcomes

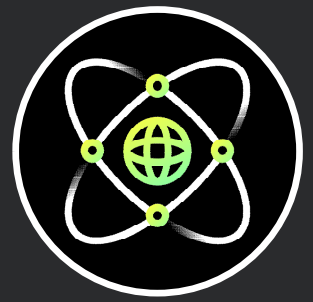

Increase subscriptions

Driving transformation in product mix to expand subscription business

Clarivate™

© 2024 Clarivate. All rights reserved.

Building a growth engine from enriched, pharma-grade data products

3

Investing in Real World Data

Target life sciences end users

Evolving our RWD business model toward tailored solutions and go-to-market for core pharma, biotech, and medtech customers

Build therapy area franchises

Focusing on differentiated therapy area and indication-level subscription-based data solutions, leveraging full range of LS&H content and expertise

Analytics-ready premium data

Transforming disparate data into clean, connected fit-for-purpose data packages, scalable across life sciences enterprises

Clarivate™

04 Definitive Healthcare · May 2026 Investor Presentation

Market sizing, data moat, healthcare customer segmentation

Original PDF pages: 6, 8, 11

Selected pages preserved from source; for private design reference.

Definitive Healthcare highlights

1. Large and growing $7B+ SAM[1] in healthcare market with significant expansion opportunities
2. Demonstrated strong non-GAAP profit and margin profile and significant unlevered free cash flow generation
3. Sophisticated healthcare AI and analytics create formidable competitive moat with unique proprietary data at the core
4. Flexible data delivery and integrations via mission-critical SaaS platform and easily paired via numerous CRM, MDM, and other workflow applications
5. Experienced management team with track record of disruption and innovation
6. Expert Customer Success, Value Delivery and Advanced Analytics teams maximize customer value

[1]SAM or “Serviceable Addressable Market” refers to the revenue opportunity that we believe is available for our data and analytics platform, a subset of the Global Healthcare Analytics Market.

Data depth that powers real growth

Leading reference and affiliation

- 3M+ HCPs
- 1.6M+ executives
- 340K+ organizations
- 7M+ affiliations
- 1.6M+ tech installations

Robust claims data

- 17B+ Hx/Mx claims
- 37B+ Rx claims
- 330M unique patients
- 9+ years of data

Deep KOL data

- 16M+ global KOL and expert profiles
- 920K+ clinical trials
- 6M+ presentations
- 32M+ publications

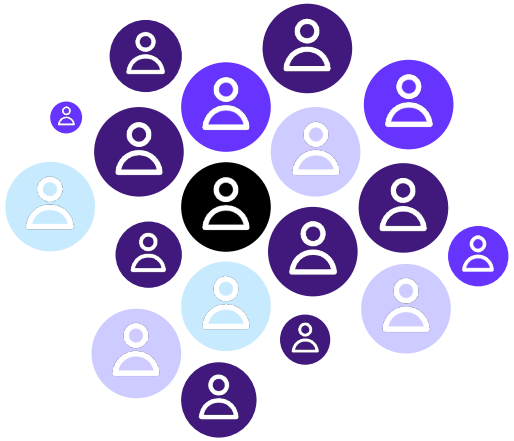

Rich consumer data

- 225M+ consumer profiles
- 500+ consumer health attributes
- Defined consumer segments
- Spending profiles
- SDOH data

The Atlas Dataset delivers a truer picture of our customers' target market

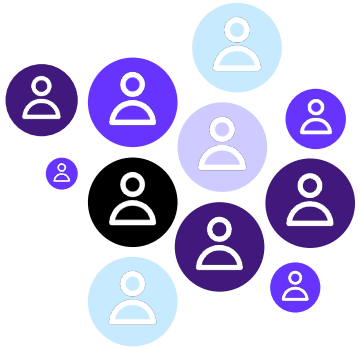

At one midwestern IDN…

Physician-level claims lens alone dramatically overstates the number of unique patients

Start with 6,566
METASTATIC LUNG CANCER PATIENTS

Adding analysis based on organization-level claims refines the number of patients, but still significantly overstated

Looks like 1,294
METASTATIC LUNG CANCER PATIENTS

Mapping DH reference and affiliation data with claims provides a much more accurate estimated number of unique patients

Actually only 744
METASTATIC LUNG CANCER PATIENTS

06 Tempus AI · Personalis Acquisition 2026

Deal rationale, addressable market, data flywheel

Original PDF pages: 3, 6, 10

Selected pages preserved from source; for private design reference.

Tempus to acquire Personalis, more tightly integrating ultrasensitive Molecular Residual Disease (MRD) into its AI-enabled precision oncology platform

TEMPUS

MRD Market Expansion

Expands participation in $20+ billion, rapidly growing MRD market with an ultrasensitive clinically-validated test.

Comprehensive Portfolio

Creates a comprehensive tumor-informed and tumor-naïve testing portfolio under same ownership.

Volume Acceleration

Accelerates test volume growth through utilization of Tempus' full commercial infrastructure, as today only ~10% of salesforce sells NeXT Personal Dx.

Reimbursement Momentum & Revenue Growth

Continued reimbursement momentum will drive meaningful revenue growth as we now capture full upside from additional indications.

Data Flywheel Enrichment

Enriches our data flywheel with Personalis' proprietary longitudinal data.

Biopharma Integration

Enables more integrated biomarker and drug development partnerships.

Early MRD Detection is a Sizable, High-Value Market Opportunity

Value Proposition of MRD

Finding Answers Sooner

Leads to Improved Patient Outcomes

Early intervention and personalized treatment strategies driven by proactive detection lead to significantly improved patient survival rates and quality of life.

Market Opportunity

> $20 Billion

Total Addressable Market (TAM) in U.S.

Less than 10% penetration across most indications

Data Strategy

Expanding the Data Flywheel

with Longitudinal MRD Insights

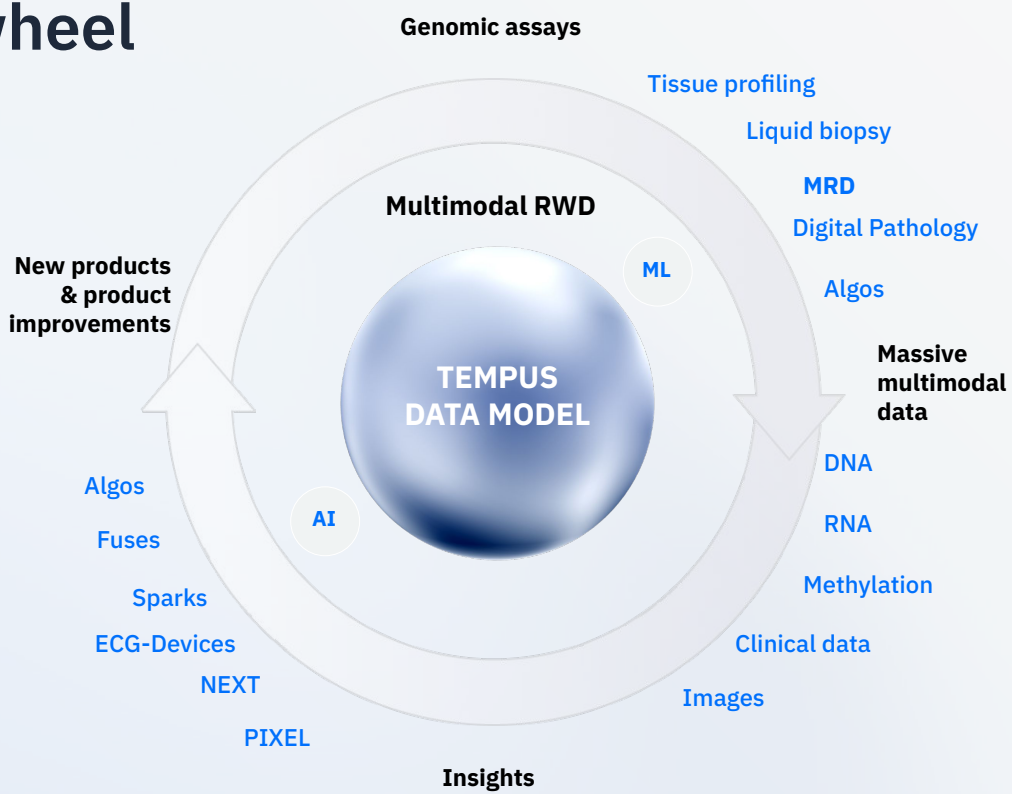

MRD data extends patient follow-up beyond diagnosis and treatment.

This expansion creates a unique longitudinal dataset specifically optimized for:

Biomarker Discovery

Trial Optimization

Therapeutic Development

09 ICON · J.P. Morgan Healthcare Conference 2025

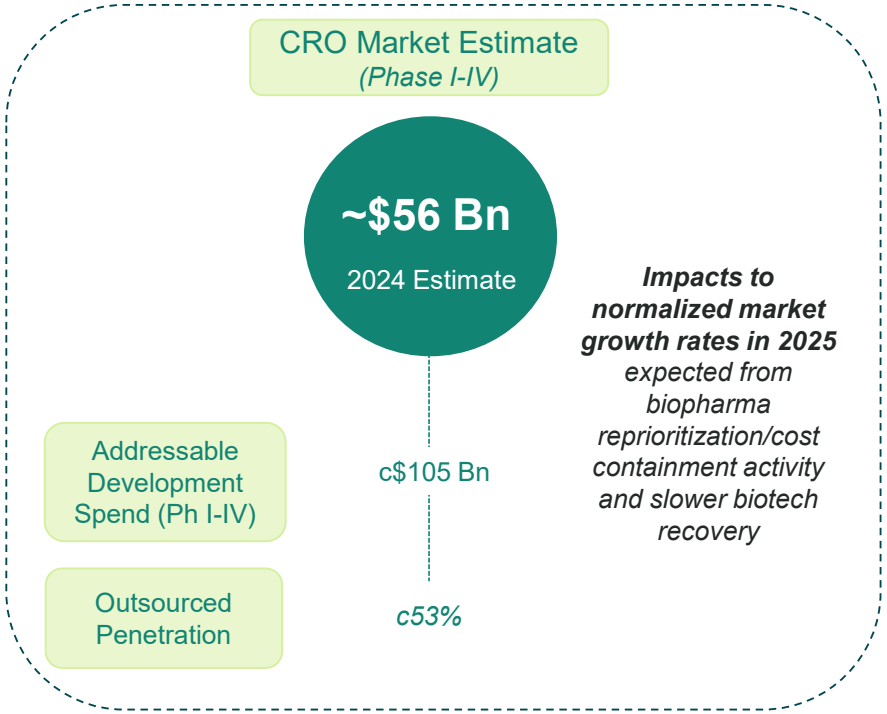

Market trends, competitive strengths, client value proposition

Original PDF pages: 4, 7, 10

Selected pages preserved from source; for private design reference.

Large market opportunity, supported by scientific innovation and need for efficient development

CRO Market Outlook - Phase I-IV Clinical Development

Near-term volatility expected, but core drivers of market growth remain in place

- Continued investment & **prioritization in late-stage development**
  Total R&D spend c18% total revenue at large pharma
- **Biotech funding improving;** volatility continuing on a quarterly basis
  Total biopharma funding increased c40% in 2024
- Rise in **novel, complex therapies**
  Oncology & neuroscience remain largest areas of development
- Advanced technologies enabling **increased innovation in development and in execution**
- Phase I-III total **clinical trial starts uptick** in FY2024

Sources: Industry Standard Research (2023); Wall Street Research; Management estimates; BioWorld

ICON's competitive strengths position us for continued leadership

Delivering significant value at the portfolio level for customers

PARTNERSHIP STRUCTURE	CENTRALIZATION AND HUBBING	INTEGRATED DATA ANALYTICS	SITE ID AND ACTIVATION	MONITORING EFFICIENCY	ANCILLARY SERVICES
					
Multi- to sole CRO model FSP and FSO → blended	Regional CRO hubs Role stratification	Integrated tech stack Enterprise analytics from ICON	Migrate to ICON Activation platform	ICON ownership of productivity Move from FTE to unit-based delivery	Enterprise strategy for design trial and execution

Outcomes:

>20%
Reduction in monitoring costs

20% Reduction in study start-up cycle times

50%
Increase in CRA productivity

10 L.E.K. Consulting · China Clinical CRO Analysis

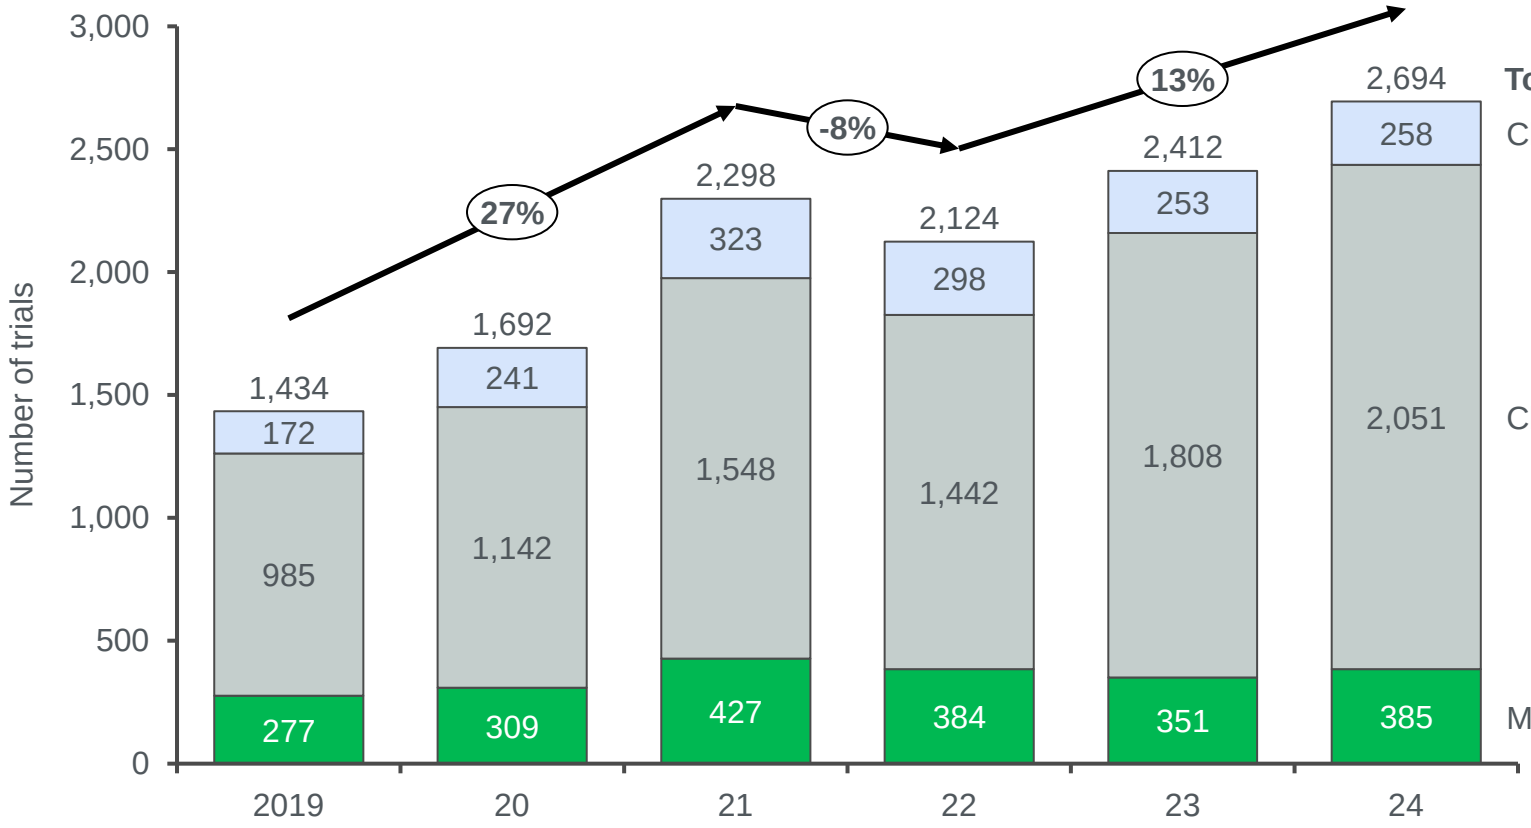

Dense analytical charts, competitive landscape, AI implications

Original PDF pages: 4, 8, 10

Selected pages preserved from source; for private design reference.

‘MNC-in-China’ and ‘China-to-global’ clinical trial volumes have seen a dip during 2022-23, but started to show signs of recovery in 2024

Newly started clinical trials by sponsor type* (2019-24)

	CAGR %				
	19-21	21-22	22-23	23-24	19-24
Total	**27%**	**(8%)**	**14%**	**12%**	**13%**
China to global	37%	(8%)	(15%)	2%	8%
China for China	25%	(7%)	25%	13%	16%
MNC in China	24%	(10%)	(9%)	10%	7%
